<p>※ 국문으로 번역하시오.</p> <ol style="list-style-type: none"> <li data-bbox="185 488 1417 936">1. The Blue House (Cheong Wa Dae) is the office and residence of the President of the Republic of Korea, located in the center of Seoul. In 1948, Syngman Rhee, the first President of the Republic of Korea, took over the residence of the former governor and started using it as the presidential office. The 4th President Yoon Po-Sun changed the name to the current name (Cheong Wa Dae) based on the blue tile roof of the main building. After that, it went through numerous remodeling and repairs to reach its present form. Now it is a place where bodyguards and staff work together with the president, and also receive very important guests. It will be very interesting to see what the future of Cheong Wa Dae, which has been with the history of the Republic of Korea, will look like. <li data-bbox="185 981 1417 1529">2. New research has linked heavy alcohol use to more than 232 million missed workdays annually in the U.S. Researchers from Washington University, St. Louis using survey data from around 110,000 U.S. adults, found that 9 percent — approximately 11 million full-time workers — met the diagnostic standards for alcohol use disorder. People who met these criteria reported missing 32 days each year, more than doubling the number of missed days for those surveyed without the disorder. Alcohol use disorder is diagnosed through a set of questions, including the amount of time one spends sick from drinking, whether a person has thought about quitting drinking but was unable, and if a person continued to consume alcohol after blacking out. The data was collected from 2015 through 2019 via the National Survey on Drug Use and Health, which is put out annually by the Substance Abuse and Mental Health Services Administration. <li data-bbox="185 1574 1417 2022">3. NASA's first Space Launch System rocket rolled out from the Vehicle Assembly Building today on a giant crawler-transporter vehicle shortly after 6 p.m. Eastern U.S. time. The moderator of NASA's livestream said some 10,000 people came to NASA's Kennedy Space Center for the event. Among them were the family members of some of the NASA employees who helped build the rocket. The rollout was part "iconic moment," as one NASA manager dubbed it, for the thousands of workers across the 50 American states who built the expendable moon rocket and ground equipment over the last decade, and part critical step toward returning to the moon and righting a troubled rocket program that NASA has spent \$22 billion on so far.

<p>※ 국문으로 번역하시오.</p> <p>4. Federal health officials are advising U.S. travelers to avoid New Zealand, Thailand and Hong Kong due to COVID-19. The Centers for Disease Control and Prevention (CDC) moved the three destinations to its level 4 COVID-19 risk category Monday due to their "very high" COVID-19 levels. The CDC advises all travelers, regardless of vaccination status, to avoid travel to level 4 destinations. "If you must travel to these destinations, make sure you are fully vaccinated before travel," the federal agency says on its website. New Zealand and Thailand have eased entry requirements in recent weeks, while Hong Kong prohibits entry from outside Greater China among nonresidents. The three join more than 130 other destinations on the CDC's list of areas with "very high" rates of COVID-19. Countries are considered to have very high COVID-19 levels when they report more than 500 new cases per 100,000 people over the past 28 days.</p>
